What We Learned

Science is back!

We have our Science Activities in our Activity Room once again. From Toddlers to 4 Years Olds. Science is very important in their Learning Enviroment.
Please check you class calanders.
(Yes, even toddlers can do science...)

Patterns in Math

Children enjoy activities that allowed them to collaborate in groups and find the missing shapes in different pattern sequences.

Reminders

We are in need of volunteers for:
Classroom Mystery Readers
20 mins.
Toddler Carline - 20mins.
9:25am-9:40am

If you would like to sign up, please let me know.

Upcoming Events

- Oct. 2: TWD/No School
- Oct. 31: Halloween Parade 10:00am
- Brest Cancer Awareness Month

Phone: 704-542-0911

Email: preschool@lslc.church

Preschool Science

Experiencing science in preschool is essential because it channels a child's natural curiosity into foundational cognitive, language, and social-emotional skills. Between the ages of 1 and 4, children are instinctive "cause-and-effect investigators". They learn by doing—building theories, testing boundaries, and figuring out how their immediate world works. Introducing structured yet playful science experiences at this stage provides a critical framework for lifelong learning

Preschool Math

Introducing math to children ages 1 to 4 **builds a crucial cognitive foundation for lifelong problem-solving, academic success, and spatial awareness**.

Why Early Math Matters

Strengthens Thinking Skills: Early math teaches children how to observe, question, and break down problems logically.

Predicts Future Success: Studies show that early math skills are among the strongest indicators of later academic achievement in both math and reading.

Capitalizes on Curiosity: Toddlers naturally notice sizes, quantities, and patterns, making ages 1 to 4 an ideal window to foster an organic love for the subject.

Supports Language Growth: Learning terms like "more," "less," "bigger," or "shorter" helps children communicate their thoughts with greater precision.

Boosts Confidence: Playful, low-pressure math prevents later anxiety and fear around formal school mathematics. Resources from the **National Association for the Education of Young Children (NAEYC)** outline how natural these concepts are in early **childhood development**.

Simple Ways to Introduce Math Through Play

Sorting Objects: Let toddlers group blocks or toys by color, shape, or size during cleanup.

Counting Aloud: Count stairs as you climb them or snacks on a plate to build familiarity with numbers.

Spatial Play: Use puzzles, nesting cups, and building blocks to teach balance, geometry, and spatial relationships.

Recognizing Patterns: Clap to a rhythm or read counting books together during daily routines. Guidance on **early math education** shows that hands-on exploration prevents frustration.

Good Morning Parents,

We appreciate your presence as we begin this school year together. Our team has worked so hard to prepare for a wonderful experience.

On August 31st, we held a Community Deep Cleaning event and gathered to pray for our preschool, children, families, and teachers. With the help of volunteers from our church congregation and Pastor Sara, we thoroughly cleaned the entire preschool. This marks the beginning of an annual tradition that we are excited to continue.

During the first two days of school, we reintroduced a special opportunity that we have not had since 2019. Parents were invited to walk their children to their classrooms, and I hope you all enjoyed this experience. Thank you for helping ensure a smooth transition for your little ones.

We also appreciate your generous contributions of supplies, which help us maintain a clean and healthy environment for everyone. A big thank-you to those who attended our inaugural family event, "Meet the Teacher Day." We recognize that many of you took time off work to join us, and we are truly grateful. For those who were on vacation, we understand, and rest assured that more opportunities to engage will arise.

As you review the classroom calendars, you will notice that I have incorporated science for every age level, along with a state-approved, age-appropriate curriculum for our toddlers, twos, and three-year-old classes. The four-year-old class will continue with the Creative Curriculum program to prepare our children for kindergarten.

Family involvement is a vital part of our preschool community. I am seeking volunteers for each class to assist teachers with lesson plans, bulletin boards, mystery readers, and upcoming events, including our much-anticipated International Lunch Day in November. This gathering is one of our favorites, and we could use help setting up tables and chairs. I will send out sign-up sheets shortly.

In December, we will host our Christmas Concert, where every child will participate and sing.

Ms. Elsie D.

Dear parents,

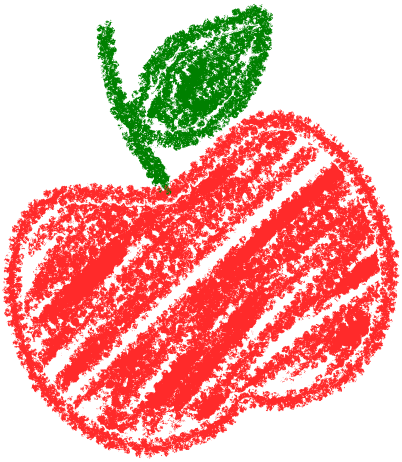

We are off to a great start!
September is always an exciting month, we learned new routines and made new friends!
We finished our literary unit based on IS YOUR MAMA A LLAMA?
Your child read about Dave who hangs upside down , Fred whose mama has a very long neck and white feathers . Jane who grazes on grass, Clyde who has whiskers and flippers. Rhonda who rides in her mother's pocket and Llyn who has big ears , long lashes and fur.

Our October story unit is THE LITTLE OLD LADY WHO WAS NOT AFRAID OF ANYTHING. This is a delightful story about a little old lady who decides to take a walk through the forest and is followed by different articles of clothing. Each piece of clothing making its own movement and sound. Children love the repetitions of words and phrases in this story .

Our Halloween parade will be on October 30th

Thank you for a great start !

Ms Lindsey

September has come to an end and the children have settled into our classroom routine very nicely.

🍁October is here, autumn has arrived, and the children will be learning about colorful fall leaves, making decorations for autumn and Halloween! We will be creating crafts, playing games and singing spooky songs... we are sure to have a Spooktackular month!

Happy birthday to Jose Andres this month!
Ms. Trish

It’s Library Time

September is the beginning of a new school year and a time for our 3- and 4-year-olds to get to know their classroom, teachers, school, and new friends. The children are learning their daily schedule, classroom routines, and school rules while becoming more comfortable and independent each day.

We had a special "All About Me" Week, and it was wonderful to see the children excited to share about themselves, their families, favorite colors and foods, and the things they like and dislike.

These activities help them build confidence, communication skills, and friendships.

We are excited to see what a wonderful year of learning and growing lies ahead!

Playground Fun

Library Time

We had a great start in September!
Everyone is getting to know new friends and adjusting to preschool beautifully. We had so much fun during our first month, and there is much more excitement on the way.
Now that October is here, we have many fun events planned:
October 2nd: Teacher Work Dat (School is closed)
October 5th: Library Lady Visit
October 15th: Wear Orange Day
October 21st: Science Activity
October 30th (10:00 AM): Halloween Parade.
This event is for parents and family! Come see your little ones dress up and parade around the parking lot.

Monthly Themes & Learning Focus
Theme: Fall & Pumpkin
Color of the Month: Orange & yellow
Skills: We will continue to explore colors and shapes through lots of fun, hands-on activities.

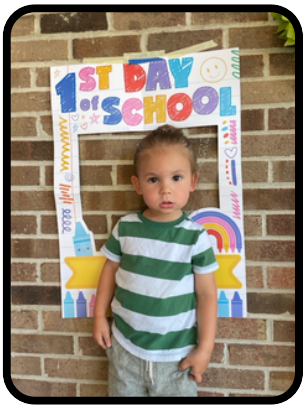

Reminders
Outdoor Play: We go outside every day unless it rains.
Clothing: Please dress your child in weather-appropriate clothes so they can play comfortably.

🌊 The Little Aquarium Classroom News: 🌊

👋 Welcome Back to School!

Welcome to a brand new school year! We are so excited to welcome your little ones into our toddler community. September is all about building routines, making new friends, and settling into our classroom rhythm.

Our main goal is to ensure that your children learn, play, and grow together in an environment filled with harmony, love, and lots of games.

During these first weeks of September, our primary focus is that your child feels safe, secure, and confident at school. You might see a few extra tears at drop-off during this transition phase, which is completely normal! We promise plenty of extra hugs, reassuring words, and playful activities to help them adjust quickly and feel right at home.

🍎 What We Are Learning Next Month

Our classroom will be buzzing with excitement as we dive into hands-on exploration! Here is what we have planned:

Apples & Autumn: We will talk about apples, taste different varieties, and explore their shapes and textures.
Rainbow Colors: We are going to explore all the beautiful colors of the rainbow through art and matching games.
Vroom Vroom! We will play with lots of cars, building ramps, tracking tracks, and practicing sharing.
Science Class: In science, we will explore color mixing to watch how new colors magically appear when combined

Warmly,

Miss Laura and Miss Amalia.
